Senior software engineer with 5+ years of full-stack experience across consumer and enterprise products.

Experience

Celonis

Los Angeles, CA

Senior Software Engineer (promoted Oct 2025)

Jan 2023 - Present

- Owned the Celonis Knowledge Model backend: a user configuration store, and business semantic layer powering all data queries throughout the platform in non-legacy products. Java / Spring Boot
- Led planning, design, and implementation for product features and engineering initiatives. Coordinated discussion, work and prioritization across multiple engineering teams, product areas, countries
- Heavily utilized Claude Code and Codex for spec-driven agentic engineering, company-wide codebase research, large scale refactoring / codebase maintenance, MCPs (Datadog, Slack, Jira, and more). Created coding standards, reusable scaffolding plans, business context summaries for agents
- Reduced latency in main user facing product (Celonis Studio) query execution path from ~600 to ~200ms over a quarter through instrumentation, optimization, and cross-team investigation + prioritization
- Direct technical advisory and implementation for enterprise customers; developed custom migration tooling to enable successful retirement of a legacy product
- Created Jest based API testing framework with strongly typed clients, authentication, automated setup and cleanup actively used and contributed to by multiple teams
- Frontend feature development for Q&A based beginner-friendly business data exploration product. Angular / TypeScript
- Tech talks in LA, Bay Area, Munich offices: Playwright integration testing, Latency investigations, custom integration testing framework, philosophical future product and server architecture directions

Opendoor

Los Angeles, CA

Software Engineer

Mar 2022 - Nov 2022

- Full stack engineer on Opendoor's home buying experience. React, GraphQL, Ruby on Rails, Mongo.
- Ops-focused work on internal tools for MLS home touring and Opendoor agent experience
- Consumer facing mobile app (React Native) and web feature development for home browsing, tour scheduling, home unlocks
- Wrote design/scoping documents, led planning discussions on my features and more general future initiatives
- Monitoring, analytics, and analysis using Datadog, Amplitude, Optimizely, Snowflake

Poshmark

Redwood City, CA

Software Engineer

Jan 2021 - Feb 2022

- Primary frontend engineer for features including bulk closet actions, seller clienteling tools, mobile-web listing creation, and listing tags using Vue.js and Node.
- Produced impact estimates, technical scopes, and post-launch monitoring using clickstream data, Kibana, and Datadog.
- Developed web features to run inside native mobile webviews
- Migrated web and mobile features from Rails/jQuery SSR frontend to Vue.js
