

JEFFREY YANG

Pasadena, CA · jeffrey_yang@ucsc.edu · 6268182618 · jeffreyyang3.github.io

EDUCATION

University of California, Santa Cruz
BS Computer Science *GPA: 3.58*

Santa Cruz, CA
Sep 2017 - Dec 2020

EXPERIENCE

Opendoor
Software Engineer

Los Angeles, CA
Mar 2022 - Nov 2022

- Full stack engineer on Opendoor's home buying experience.
- Ops focused work on internal tools for MLS home touring and Opendoor agent experience. Comms, agent payment, automated pairing, on-call support, and more.
- Consumer facing mobile app (React Native) and web feature development for home browsing, tour scheduling, home unlocks.
- Wrote design/scoping documents, led planning discussions on my features and more general future initiatives.
- Monitoring, analytics, and analysis using Datadog, Amplitude, Optimizely, Snowflake.
- React, Typescript, GraphQL, Ruby on Rails, MongoDB, Protobuf.

Poshmark
Software Engineer

Redwood City, CA
Jan 2021 - Feb 2022

- Primary web engineer on complex full stack and front end features - user closet bulk actions, a clienteling tool, user listing creation adaptation for mobile web, listing tagging, and more. Vue.js, Node.
- Intern - Summer 2020. Returned in January after graduation.
- Created impact estimates, monitoring, and scoping based on click tracking, Kibana, Datadog.
- Developed web features to run inside native mobile webviews
- Migrated web and mobile features from Rails/jQuery to Vue.js.

SPK & Associates
Software Engineering Intern

Scotts Valley, CA
April 2020 - June 2020

- Built a Flask REST API from scratch to extend an asset management server with custom SQL, update it with live information from 200+ hosts, integrate with Nagios and a password server.
- Wrote a frontend for live information and organization using vanilla JavaScript.
- Wrote reporting agent scripts for hosts in Python, supporting Linux and Windows down to RHEL 5, Ubuntu 13, Windows Server 2008.
- Deployed agent scripts and performed additional configuration on remote hosts using Puppet.

MobLab
Software Engineering Intern

Pasadena, CA
June 2019 - September 2019

- Revamped results screens in MobLab's educational economics games.
- Migrated charting functionality from Dojo.js to HighCharts.
- Extended the Highcharts library with custom CSS/JavaScript for company needs.
- Implemented a new design system as part of migration.

PROJECTS

Jeffrey's Frontend Framework *TypeScript, Jest, Webpack* jeffreyyang3.github.io/nnDemoPage/
JavaScript framework I made for educational purposes. Supports DOM reactivity, declarative HTML templating, computed properties, and watchers, inspired by Vue.js. Zero runtime dependencies. Written bottom-up using TypeScript and test-driven development.

Typing Game *TypeScript, Webpack, Jenkins* jeffreyyang3.github.io/typeGameGHPages/
Minimalist typing speed game written using the above framework. User is guided to type random words, and WPM is computed in real time.
