

JEFFREY YANG

Pasadena, California · jeffrey_yang@ucsc.edu · jeffreyyang.me

EDUCATION

University of California, Santa Cruz
BS Computer Science - Honors *GPA: 3.58*

Santa Cruz, CA
September 2017 - December 2020

EXPERIENCE

Poshmark
Software Engineer

Redwood City, CA
June 2020 - Present

- Primary web engineer on complex full stack and front end features - user closet bulk actions, a clienteling tool, user listing creation adaptation for mobile web, listing tagging, and more.
- Intern - Summer 2020. Returned in January after graduation.
- Worked on a server-side rendered Express/Vue.js frontend.
- Created impact estimates, monitoring, and scoping based on click tracking, Kibana, Datadog.
- Developed web features to run inside native mobile WebViews.
- Migrated web and mobile features from Rails/jQuery to Vue.js.

SPK & Associates
Software Engineering Intern

Scotts Valley, CA
April 2020 - June 2020

- Built a Flask REST API from scratch to extend an asset management server with custom SQL, update it with live information from 200+ hosts, integrate with Nagios and a password server.
- Wrote a frontend for live information and organization using vanilla JavaScript.
- Wrote reporting agent scripts for hosts in Python, supporting Linux and Windows down to RHEL 5, Ubuntu 13, Windows Server 2008.
- Deployed agent scripts and performed additional configuration on remote hosts using Puppet.

MobLab
Software Engineering Intern

Pasadena, CA
June 2019 - September 2019

- Update the results screens in MobLab's educational economics games.
- Migrated charting functionality from Dojo.js to HighCharts.
- Extended the Highcharts library with custom CSS/JavaScript for company needs.
- Implemented a new design system as part of migration.

University of California, Santa Cruz
Economics Lab Programmer

Santa Cruz, CA
May 2018 - August 2019

- Created multiplayer web games played by 16 participants at a time, for behavioral economics research.
- Used HTML/CSS/JS and oTree, a Django based web game server framework.
- Visualized data using Pandas and NumPy.
- Used WebSockets for real time chat and game functionality.

PROJECTS

Jeffrey's Frontend Framework *TypeScript, Jest, Webpack* jeffreyyang3.github.io/nnDemoPage/
JavaScript framework I made for educational purposes. Supports DOM reactivity, declarative HTML templating, computed properties, and watchers, inspired by Vue.js. Zero runtime dependencies. Used test-driven development, CI with Jenkins.

Typing Game *JavaScript* jeffreyyang3.github.io/typeGameGHPages
Minimalist typing speed game written using the above framework. User is guided to type random words, and WPM is computed in real time.

Personal Website *Vue.js* jeffreyyang3.github.io
Vue.js personal website. Uses Vue-Router and transitions for smooth navigation. Visualizes Quicksort and Merge Sort using Vue's DOM reactivity and async/await. Contains additional project info.

Compare Cards For Me *Vue.js* jeffreyyang3.github.io/creditCardCompare
Helps users compare rewards from 40+ credit cards based on monthly spending. Uses Highcharts for visual comparison. #1 post for the day on CreditCards subreddit, 1200+ visits (Google Analytics)
